**WEB PROGRAMMING  
ACTIVITY 1.1**

**Title:** Boolean Web

**Objective:** Our website is your go-to platform for tracking your monthly learning progress, with a comprehensive "Progress Tracker" that not only monitors your achievements but also offers valuable insights into optimizing your learning journey. It also ensures easy navigation and a seamless user experience.

**Target Audience:** Students and self-learners

**Budget:** 2,662,000 pesos

**Development Timeline:** The project is estimated to take 8 months to complete.

**Number of Programmers:** We have a team of 6 programmers.

**Rate per Person:** To calculate how much each programmer will receive per month from the adjusted budget and timeline, divide the total budget by the number of months (8) and then divide that result by the number of programmers (6).

**Timeline (for 8 months):**

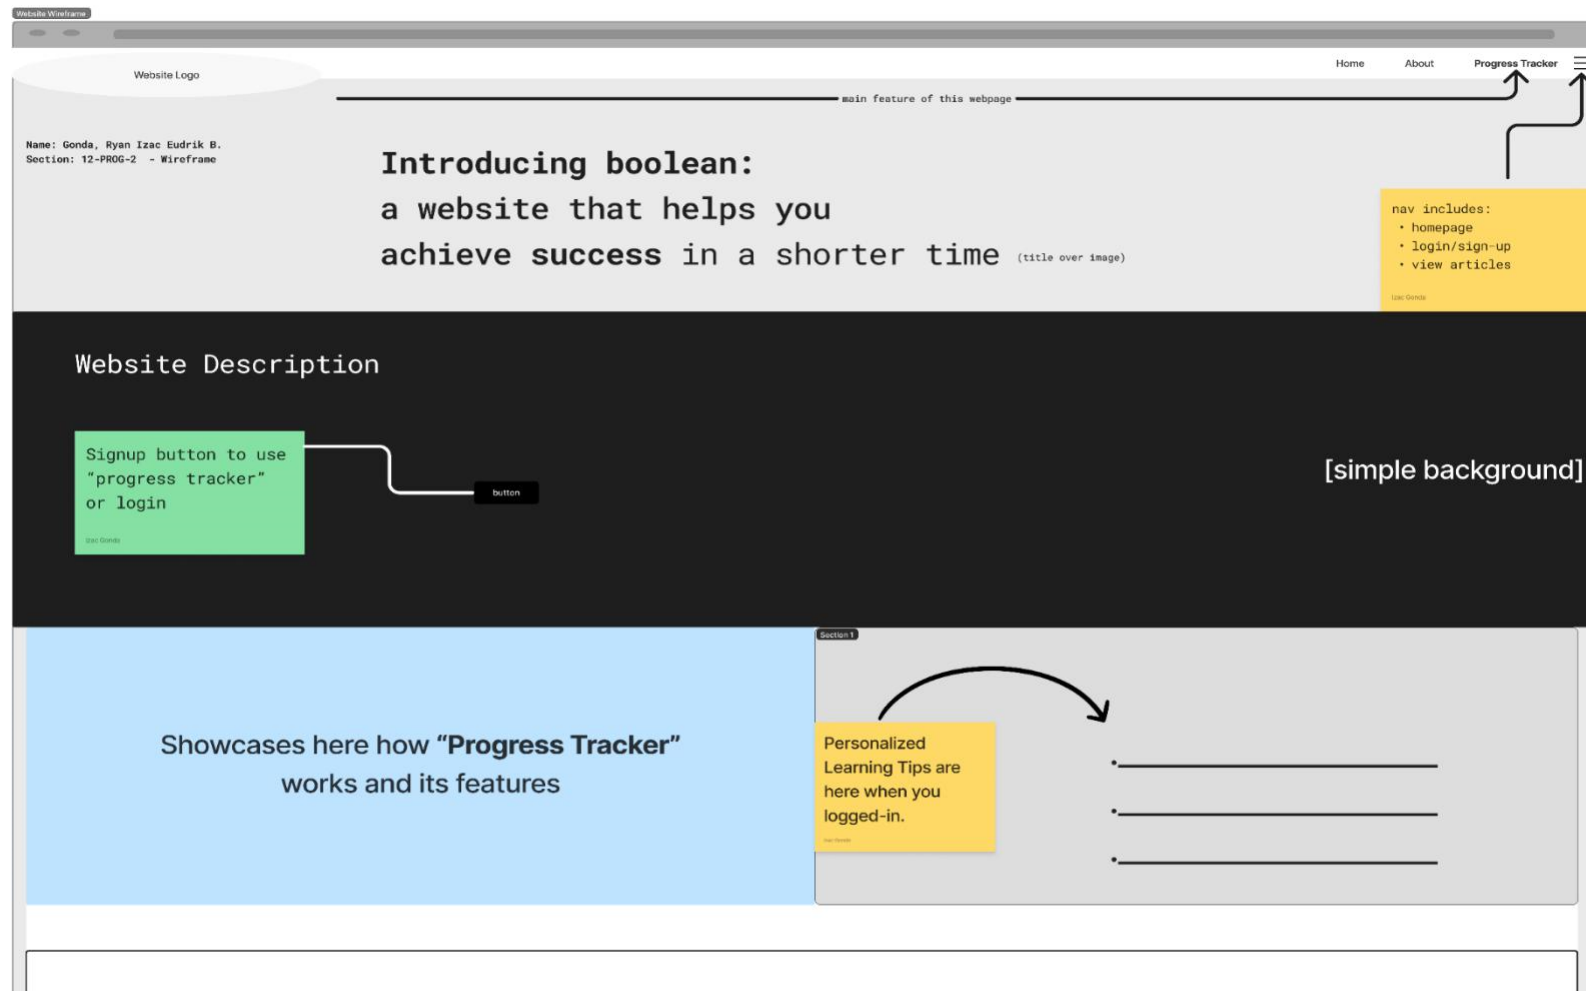

Monthly Compensation per Person = 2,662,000 pesos / 6 programmers / 8 months = 55,525 pesos monthly salary per programmer (rounded to the nearest peso).

6 programmers x 55,525 PHP/programmer = 333,150 PHP/month.

## WEB PROGRAMMING ACTIVITY 1.1

### 1. Home Page:

The home page is essential as it serves as the first point of contact for users. It should provide a clear overview of the website's purpose and navigation options, guiding users to their desired destinations.

### 2. About Page:

The about page is crucial for building trust and credibility. It offers a chance to share the website's mission, background, and the team behind it, helping users connect on a personal level.

### 3. Sign-Up Page:

The sign-up page is necessary for user registration, enabling students and self-learners to create personalized accounts. This is vital for tracking progress, saving preferences, and accessing exclusive content.

### 4. Progress Tracker Page:

This page is the core of the website, where users can monitor their learning achievements, set goals, and receive insights to optimize their learning journey. It's central to the website's value proposition.

**5. Monochrome Mode:** Monochrome mode offers an alternative minimal theme for users who prefer a different visual experience. It enhances accessibility and caters to a broader range of user preferences.

**6. Log-in Page:** The log-in page allows registered users to access their accounts securely. It's essential for returning users who want to pick up where they left off in their learning progress.

7. **Articles Page:** The articles page provides valuable supplementary content, such as educational articles, tips, and resources. It enriches the learning experience and keeps users engaged.

8. **Contact Us:** The contact us page is important for user support and feedback. It allows users to reach out with questions, suggestions, or issues, fostering a sense of community and responsiveness.
